UNITED WOUND HEALING | FELLOWSHIP Est. 2024

Skin & Wound Medicine Fellowship

Nurse Practitioner/Physician Associate

The **Dr. Pamela Scarborough Skin & Wound Medicine Fellowship** is the nation's first post-graduate fellowship dedicated exclusively to training Advanced Practice Practitioners (NPs and PAs) in wound medicine, dermatology, and limb preservation. This full-time, paid 12-month program equips fellows with the clinical expertise, board certifications, and compassionate approach needed to lead in this vital specialty.

One in four American families has a loved one living with a chronic wound. Access to specialized wound and skin care remains limited — especially in post-acute and home-based settings. This fellowship exists to change that by building a new generation of wound care specialists prepared to serve medically complex and geriatric populations. Upon completion, fellows will have the training and competency to obtain board certification in wound medicine (CWS).

Who we are looking for:

Recent Advanced Practice Provider graduates, or seasoned NP's and PA's with a passion and desire for advanced training and certification with a focus on geriatric and homebound patients.

What our Fellowship looks like:

- **Clinical Staffing —** Clinical staffing is the backbone of the fellow's workweek. It is during the staffing time that clinical knowledge and skills being developed are put into practice. This starts with supervised staffing and eventually transitions to independent clinical staffing. Interesting or complex cases encountered during clinical staffing may be presented and discussed during Office Hours with Fellowship Leadership.
- **Clinical Experiences —** Structured progression from supervised experiences to independent patient care across wound medicine, dermatology, limb preservation, and related settings.
- **Didactic Education —** Face-to-face instruction, case reviews, and independent self-study time for board exam preparation and procedural skills.
- **Research —** Collaboration with Open Wound Research (OWR) to produce and submit conference presentations, publications, or patient-facing educational materials.

Skills Required:

- This fast-paced position requires standing for extended amounts of time
- Driving! You must have reliable transportation, valid driver's license, and current auto insurance
- Board Certified Nurse Practitioner (NP, FNP, ARNP, APRN) or Physician Assistant (PA-C) licensed in Washington or Oregon
- Must be flexible, punctual, dependable, and able to work/schedule appointments as needed
- Must be trustworthy, honest and have a positive and professional attitude
- Must have strong interpersonal skills and the ability to communicate effectively with a variety of people through both verbal and written communication lines

***Do you want to grow personally and professionally by working with the best? We'd love to hear from you!**
